## CONTENTS

An investigation of the growth of turbulence in a uniform-mean-shear flow. J. J. Rohr, E. C. Itsweire, K. M. Helland and C. W. Van Atta *page* 1

Steady viscous flow near a stationary contact line. Ian Proudman and Mir Asadullah 35

The mechanisms underlying flow-induced instabilities of cylinder arrays in crossflow. M. P. Païdoussis and S. J. Price 45

Direct simulation of a turbulent boundary layer up to $R_\theta = 1410$. Philippe R. Spalart 61

The run-off condition for coating and rimming flows. Luigi Preziosi and Daniel D. Joseph 99

Experimental and numerical investigation of a forced circular shear layer. J. M. Chomaz, M. Rabaud, C. Basdevant and Y. Couder 115

The evolution of a weakly nonlinear, weakly damped, capillary–gravity wave packet. John W. Miles 141

On the receptivity of free shear layers to two-dimensional external excitation. Thomas F. Balsa 155

Large deformations and burst of a capsule freely suspended in an elongational flow. X. Z. Li, D. Barthes-Biesel and A. Helmy 179

Cumulative effects of weak pressure waves during the induction period of a thermal explosion in a closed cylinder. R. Klein and N. Peters 197

Small-amplitude perturbations of shape for a nearly spherical bubble in an inviscid straining flow (steady shapes and oscillatory motion). I. S. Kang and L. G. Leal 231

Two-dimensional bifurcation phenomena in thermal convection in horizontal, concentric annuli containing saturated porous media. K. Himasekhar and Haim H. Bau 267

Settling behaviour of heavy and buoyant particles from a suspension in an inclined channel. David Hin-Sum Law, Robert S. MacTaggart, K. Nandakumar and Jacob H. Masliyah 301

Capillary hydrodynamic effects in high magnetic fields. B. M. Berkovsky and N. N. Smirnov 319

Three-dimensional Rayleigh–Taylor instability. Part 1. Weakly nonlinear theory. J. W. Jacobs and I. Catton 329

Three-dimensional Rayleigh–Taylor instability. Part 2. Experiment. J. W. Jacobs and I. Catton 353

Vertical and lateral turbulent dispersion: some experimental results. R. I. Nokes and I. R. Wood 373

Free-surface effects on spin-up. Ulf Cederlöf 395

Mathematical and physical modelling of double-diffusive convection of aqueous solutions crystallizing at a vertical wall. Mollie E. Thompson and Julian Szekely 409

Stability bounds on turbulent Poiseuille flow. G. R. Ierley and W. V. R. Malkus 435

Measurements of the mean force on a particle near a boundary in turbulent flow. D. Hall 451

An investigation of shock/boundary-layer interactions on curved surfaces at transonic speeds. X. Liu and L. C. Squire 467

Upstream motions in stratified flow. I. P. Castro and W. H. Snyder 487

The dynamics of towed flexible cylinders. Part 1. Neutrally buoyant elements. A. P. Dowling 507

The dynamics of towed flexible cylinders. Part 2. Negatively buoyant elements. A. P. Dowling 533

Pressure drop and power dissipation in oscillatory wavy-walled-tube flows. M. E. Ralph 573

Minimizing shoreline pollution in rivers with tributaries. Ronald Smith 589
